SUMMARY

Software Engineer with 4 years of experience building and scaling production applications and backend systems. Delivered real-world products across SaaS, social, and transportation domains, supporting 10,000+ users and millions of records. Strong background in Flutter, native Mobile, and backend development with Laravel and ASP.NET Core, Proven in real-time systems, secure online payments, from system design and backend deployment to app store releases and production monitoring.

SKILLS

- Software Engineering
- Backend via Laravel and ASP.NET Core
- Mobile Applications Developer
- Firebase Tools & Analysis tools
- CI/CD

EXPERIENCE

12/2025 - Present

Clean Architecture Generator Tool (.NET ABP SaaS)

Built an internal tool that generates Project Features based on API documentation for .NET ABP framework multi-tenant based architectures, implementing Clean Architecture with proper layering and automated project scaffolding.

11/2025 - Present

Full-Stack Software Engineer | Sawan Honey E-Store – Syria

- Built backend using Laravel
- Developed responsive frontend and admin dashboard using Vanilla JavaScript, HTML, CSS.
- Integrated WhatsApp-based ordering workflow.
- Deployed and managed application on VPS (server setup, database, security, maintenance).

10/2023 - 10/2025

Senior Software Engineer – Mobile Platforms | Workiom – Turkey (Hybrid Remote)

- Led architecture and development of a production Flutter SaaS application serving 15,000+ active users and managing millions of records.
- Designed scalable mobile architecture, structured state management, and real-time communication layers.
- Integrated complex enterprise backend systems built in .NET.
- Built secure authentication flows, role-based systems, and high-performance data layers.
- Delivered full engineering lifecycle: development, CI/CD, monitoring, and store releases.
- Integrated Firebase tools & Analysis tools
- Designing and modifying packages to support and enhance application features.

EXPERIENCE

05/2023 - 11/2023

Software Engineer – Mobile Platforms | SELLanyAD – Germany (Remote)

- Engineered a real-time social platform supporting video, voice, and messaging features.
- Built Flutter applications with native integrations using Kotlin and Swift.
- Integrated WebRTC, cloud services, and Firebase tools.

10/2022 - 06/2023

Software Engineer – Full Stack | Focus – Damascus, Syria

- Led development of a real-time transportation and service platform with 5,000+ concurrent online users.
- Built Flutter applications and backend systems powering live tracking and real-time services.
- Designed and implemented a complete online payments system for company products.
- Integrated MTN, Syriatel, Fatora, E-Cash, E-Lira, Sama Pay.
- Handled App Store & Google Play deployments and backend server deployments on our Server.
- Integrated Firebase services (Push Notifications, Analytics, Crashlytics).

10/2020 - Present

Full-Stack Software Engineer (Freelance) | Damascus, Syria

- Delivered production systems across mobile apps, backend services, and admin dashboards.
- Built backend platforms using Laravel and ASP.NET Core.
- Developed dashboards using Flutter Web and Laravel Blade.
- Deployed full systems, including servers, databases, and cloud services.
- Integrated Firebase tools for messaging, analytics, and monitoring.
